SUBJECT INDEX

Acetic acid ions
Fragmentation of acetic acid ions with selected internal energies 515
Acetylanisole isomers
Elimination of methyl radical from acetylanisole isomers by electron impact 1
Alkyl halides
Subtle interplay of functional groups and chain length effects in the Fe^+-mediated gas-phase chemistry of alkyl halides containing double and triple bonds 135
Aromatic polymers
Selective resonance enhanced multiphoton ionization of aromatic polymers in supersonic beam mass spectrometry 265
Averaging methods
Averaging methods applied to quadrupolar FT-ICR perturbation problems 417

BEBE tandem mass spectrometer
Generation and characterization of neutral and cationic 3-sila-cyclopropenylidene in the gas phase. Description of a new BEBE tandem mass spectrometer 369
Biological molecules
Some second-order errors in average mass measurement of complex biological molecules in time-of-flight particle desorption mass spectrometry 17
Bromine ions
Hydration of halide and bromine negative ions in a supersonic jet expansion 293

C_{60}^+
The reactivity of C_{60}^+ and C_{60}^{2+} 565
C_{60}^{2+}
The reactivity of C_{60}^+ and C_{60}^{2+} 565
Cadmium telluride
Comparison of ion beam compositions of cadmium telluride and a cadmium–tellurium crossed electrode assembly obtained by spark source mass spectrometry 183

CH/CC bond activation
On the mechanism of Fe^+-mediated CH/CC bond activation as studied by intramolecular kinetic isotope effects 559
Revision of the mechanism of Co^+-mediated CH/CC bond activation of *n*-hexanol in the gas phase 553
CH_2CHCN
The ion/molecule chemistry of CH_2CHCN 319
Charge stripping
Charge stripping as a probe to determine the effects of ligation in metal ion complexes produced in a fast atom bombardment source 545
Chlorine ions
Breakdown of spin conservation for collisions of chlorine ions with atomic and molecular gases 349
Chlorobenzene cations
Unimolecular decay rates for laser induced Cl loss from energy selected chlorobenzene cations 165
Clusters
Free electron attachment to van der Waals clusters 143
Co^+
Revision of the mechanism of Co^+-mediated CH/CC bond activation of *n*-hexanol in the gas phase 553

Dictyostelium discoïdeum
Influence of target preparation in secondary ion mass spectrometry: molecular mass determination of a pterin isolated from *Dictyostelium discoïdeum* 409
N,*N*-dimethylformamide radical cations
Anomalous kinetics in fragmentations of *N*,*N*-dimethylformamide radical cations R1

Electron attachment
Free electron attachment to van der Waals clusters 143
Ethane loss
Threshold photoelectron photoion coincidence study of the ethane loss from energy selected pentane ions cooled in a supersonic expansion 301

Fe^+
On the mechanism of Fe^+-mediated CH/CC bond activation as studied by intramolecular kinetic isotope effects 559
Subtle interplay of functional groups and chain length effects in the Fe^+-mediated gas-phase chemistry of alkyl halides containing double and triple bonds 135
Field desorption
Computer-controlled activation of 25 μm diameter tungsten wire for field desorption 491
Fourier transform mass spectrometer
A 3T external source quadrupole Fourier transform mass spectrometer for ion/molecule reactions and analysis 91

Graphite
Investigation of thermal ion emission characteristics of graphite 205

Halide ions
Hydration of halide and bromide negative ions in a supersonic jet expansion 293
Halogenated cations
Influence of electronic excitation in the charge reversal of halogenated cations 453
Helium
Experimental measurements and theoretical calculations of the mobility of the N^+ ion in helium 215
Hexanes
Laser single photon ionization mass spectrometry of linear, branched and cyclic hexanes 475
n-Hexanol
Revision of the mechanism of Co^+-mediated CH/CC bond activation of *n*-hexanol in the gas phase 553
Histidine
Collision induced dissociations of deprotonated peptides. Dipeptides containing phenylalanine, tyrosine, histidine and tryptophan 333
Hydrogen ion emission
Hydrogen ion emission from a surface bombarded by multiply charged ions at high ($\simeq 0.5 MeV u^{-1}$) and medium ($\simeq 0.5 keV u^{-1}$) energies R11

Ion mobility spectrometer
The performance of an ion mobility spectrometer for use with laser ionization 441
m-Iodotoluene
Dissociation dynamics of *m*-iodotoluene molecular ion: photodissociation and metastable ion decomposition 103
Ion/molecule reactions
Temperature effect of ion/molecule reactions in a water molecular beam crossed by an electron beam 9

Mass spectral resolution
Can Fourier transform mass spectral resolution be improved by detection at harmonic multiples of the fundamental ion cyclotron orbital frequency ? 49
Metal ion complexes
Charge stripping as a probe to determine the effects of ligation in metal ion complexes produced in a fast atom bombardment source 545
Methane elimination
On the activation energy for methane elimination from the trimethyloxonium cation R7
Molecular weight distribution
Measurement of molecular weight distribution of a complex system using mass spectrometry 379

N^+
Experimental measurements and theoretical calculations of the mobility of the N^+ ion in helium 215
N_4^+
Reactions of N_4^+ with rare gases from thermal to 10 eV center-of-mass energy:

collision-induced dissociation, charge transfer and ligand exchange 29
Nitrogen cluster ions
Metastable decay of stoichiometric and non-stoichiometric nitrogen cluster ions 127

Organic monolayer–metal systems
Molecular sputtering and damage induced by kiloelectronvolt ions in organic monolayer–metal systems 531
Oxazinones
Mass spectrometric and MNDO study of electron impact induced fragmentation of some norbornane- and norbornene-condensed pyrimidinones and oxazinones 225

Pentane ions
Threshold photoelectron photoion coincidence study of the ethane loss from energy selected pentane ions cooled in a supersonic expansion 301
Phenylalanine
Collision induced dissociations of deprotonated peptides. Dipeptides containing phenylalanine, tyrosine, histidine and tryptophan 333
Potassium chloride
Thermal dissociation and positive ionization of potassium chloride on tungsten 393
Propynal
Photoionization of propynal in the gas phase 503
Protonated ketones
The structure and mobility in air of protonated ketones 435
Pterin
Influence of target preparation in secondary ion mass spectrometry: molecular mass determination of a pterin isolated from *Dictyostelium discoïdeum* 409
Pyrimidinones
Mass spectrometric and MNDO study of electron impact induced fragmentation of some norbornane- and norbornene-condensed pyrimidinones and oxazinones 225

Quadrupole
A 3T external source quadrupole Fourier transform mass spectrometer for ion/molecule reactions and analysis 91
Quadrupole detection FT-ICR
Theory of quadrupole detection Fourier transform-ion cyclotron resonance 281
Quadrupole ion trap
Study of a quadrupole ion trap supplied with a periodic impulsional potential 191

Residual gas analyzers
Modified residual gas analyzers as sources of mass-selected ion beams 247

Sila-cyclopropenylidene
Generation and characterization of neutral and cationic 3-sila-cyclopropenylidene in the gas phase. Description of a new BEBE tandem mass spectrometer 369
Silane
Cross-sections for the formation of negative ions by electron impact on silane 83
Spin conservation
Breakdown of spin conservation for collisions of chlorine ions with atomic and molecular gases 349

Tantalum
The influence of unimolecular cluster decompositions in the nanosecond time range on the secondary ion mass spectrum of tantalum R19
Thermal ion emission
Investigation of thermal ion emission characteristics of graphite 205
Trimethyloxonium cation
On the activation energy for methane elimination from the trimethyloxonium cation R7
Tryptophan
Collision induced dissociations of deprotonated peptides. Dipeptides containing phenylalanine, tyrosine, histidine and tryptophan 333
Tungsten
Thermal dissociation and positive ionization of potassium chloride on tungsten 393

Tungsten isotope ratio determinations by negative thermal ionization mass spectrometry 361
Tungsten wire
Computer-controlled activation of 25 μm diameter tungsten wire for field desorption 491
Tyrosine
Collision induced dissociations of deprotonated peptides. Dipeptides containing phenylalanine, tyrosine, histidine and tryptophan 333

Unimolecular decay rates
Unimolecular decay rates for laser induced Cl loss from energy selected chlorobenzene cations 165
